

“

Business continuity, enhanced user experience, security risk mitigation and building business-aligned business models are some priorities of the CIOs of today.

**-Anitosh Halder**

SVP & Business Head - Cloud,  
DC & Managed Services,  
Sify Technologies

”

“

Cloud has been a boardroom discussion for years, but lift and shift approach will no longer work.

**-Kirti Patil**

Joint President - IT & CTO,  
Kotak Life Insurance

”

Technological innovation and business innovation are tightly coupled and go hand-in-hand. These are not two different verticals when it comes to the CIO community.

**-Deo Shanker Tripathi**  
CEO, Aadhar Housing Finance

“  
We are now moving from  
cloud to cloud native.

**-Sunando Bhattacharya**

CEO, IndiQus Technologies

”

“

Data secrecy is one of the  
biggest challenges for  
countries like India.

**-Swapnil Jambhale**

Co-Founder & COO, SafexPay

”

“

In the energy exchange industry, many changes are driven by compliance. We need to make changes at short intervals (one or two months). The Cloud gives us the time to move advantage. It's about time to market, agility, and uptime.

**-Sangh Suman Gautam**

Chief Technology Officer, Indian Energy Exchange

”

“

The first movers, who successfully integrate cloud into every facet of their business, drive faster innovations and make experimental leaps into new verticals and new markets.

**-Rahul Neel Mani**

Vice President Community  
Engagement & Editorial,  
ISMG & Founding Director,  
Grey Head Media

”

“

Having a roadmap for application modernization is essential. The focus for modernization should be on people, process and technology – in that order.

**–Vasudev Prabhu**

Director of IT resiliency, Cognizant

”
