

Use cases by experience

Smart spaces

Network performance: Work with experts who can detect and repair your network while making it resilient and adaptable. Achieve consistent, reliable access with Cisco Meraki Switching and Secure Wi-Fi.

Provisioning at scale: Rely on certified Cisco professionals and pre-provisioned hardware to launch new locations quickly—knowing access will be reliable from anywhere.

Future-proof network foundation: Gain a flexible configuration model that bridges legacy equipment with the next generation of technology. Leverage analytics from access points to optimize network usage.

Secure environments

Network security: Leverage cloud-managed security with malware and intrusion protection delivered by Sify experts to avoid sudden disconnections or attacks with immune access points.

Threat detection: Access Sify expertise in auditing, penetration testing, role-based workflows, and maintaining secure hardware updates to defend against known and emerging threats.

Network scalability: Scale efficiently and build your network by connecting to an ecosystem of sensors and IoT devices. Maximize bandwidth and traffic flows as you add new employees, applications, and technologies.

Sify-managed Access, powered by Meraki

As businesses evolve to meet the needs of an increasingly dynamic, hybrid workforce, ensuring secure access is more important than ever. Ensure your teams have reliable access where and when they need it. Entrust Sify experts to manage your end-to-end access experience and offer critical insights on a single platform, so your business can focus on more strategic initiatives.

Common challenges

- **Consistency across locations:** Users expect reliable and consistent Wi-Fi access from all branches.
- **Network quality:** Congested network traffic or poorly-routed traffic wreaks havoc on users' network quality, causing frustration and loss in productivity.
- **Complex infrastructures and legacy equipment:** Mismatched, outdated, and poorly configured equipment cause outages and impair network performance.
- **Security concerns:** Increased traffic from people, devices, and servers creates opportunities for bad actors to infiltrate and overwhelm networks.
- **Tedious onboarding experience:** Guest onboarding processes are often complex and time-consuming, leading to user frustration.

Business outcomes of Sify-managed Access

- **Reliable access:** Maximize network reliability and increase uptime with industry-leading Cisco Meraki hardware. Achieve consistent performance and prevent failure with redundancy and automated safeguards.
- **Network visibility:** View your environment and gain access to powerful analytics that can help you make strategic decisions with an intuitive, centralized platform managed by experts.
- **Secure connectivity:** Protect your network across locations without sacrificing experience with threat defense technologies integrated by Meraki and Sify.
- **Fast deployment:** Launch new locations quickly with low-touch provisioning and expert support. Scale with efficiency knowing your access is consistent across branches.
- **Lower network costs:** Capitalize your existing investments while creating a path for scalability and performance to future-proof your technologies, enabling next-generation internet and IoT.
- **Access freely:** Gain fast, reliable, and secure access across all of India.

cost savings due to zero-touch provisioning, scheduling, reporting, visibility, and alerts

Deliver exceptional experiences with the cloud, at scale

With a focus on creating impactful experiences for your workforce and workplace, the Meraki Platform integrates the solutions you need for success in the cloud. Sify is here to support and make the process seamless.

Cisco Meraki

Hybrid & remote workforce

Ensure a consistent, secure network experience with the same in-office performance and support, no matter where employees work

Smart spaces

Exceed guest and employee expectations with intuitive on-site workspaces using better insights and intelligence

Safe environments

Provide superior monitoring of movement and capacity across locations for a more secure workplace

Sify-managed Access, powered by Meraki in action

Challenge

India's largest steel conglomerate faced challenges outsourcing IT under traditional models

Solution

Sify's NOC setup coupled with a managed solution outmatched their standard IT practices

Result

India's largest steel conglomerate can now integrate all IT and OT assets across their organization

Next steps

- Schedule a lab or demonstration to experience our features in a live environment

About Sify

A Fortune India 500 company, Sify Technologies has been called on to build IT solutions for both cloud-only enterprises and enterprises who seek to outsource IT as a business service. Today, more than 10,000 businesses across multiple industries take advantage of our technology services and conduct their business seamlessly from more than 1,600 cities in India. Internationally, Sify has a formidable presence across North America, the United Kingdom, and Singapore.

About Cisco

Cisco (NASDAQ: CSCO) enables people to make powerful connections—whether in business, education, philanthropy, or creativity. Cisco hardware, software, and service offerings are used to create the Internet solutions that make networks possible—providing easy access to information anywhere, at any time.
