

Raju Vegesna

Chairman & Managing Director
Sify Technologies Limited

Raju Vegesna's vision and accomplishments serve as aspirations for an entire generation in the middle of India's technological advancement.

Raju's academic excellence in India led him to Wayne State University, Detroit, USA, where he earned a Master's degree in Computer Engineering and was recruited by Motorola where he played a pivotal role in writing the microcode for their microprocessors.

Raju is a highly successful serial entrepreneur. He co-founded and served as Chief Architect of Ross Technology Inc. and his expertise is reflected in multiple patents and publications on microprocessor technologies. He built and exited two multi-billion-dollar enterprises; ServerWorks, which significantly contributed to Internet penetration, and ServerEngines, which advanced cloud technology.

Raju's investment in Sify Technologies is focused on positioning India's digital infrastructure to global standards. Under his leadership, Sify has become India's most comprehensive ICT player, pioneering India's first Made-in-India cloud platform and a full stack of managed services. A world-class network infrastructure, state-of-the-art data centers, and AI cloud solutions today make Sify the first choice for enterprises undergoing digital transformation.

Raju's venture capital fund, Sify Ventures, empowers global entrepreneurs who are building cutting-edge technologies.

Raju's philanthropic initiatives through RV Foundation focus on providing drinking water, supporting the elderly and marginalized children, and promoting sports at grassroots level, all aimed at creating lasting societal impact.
